## THE GT SUMMER SERIES A NEW ERA IN MOTORSPORT

*Full focus on amateurs and  
equal opportunities  
with surprising innovations*

*The GT Summer Series focuses entirely on amateurs and gentlemen drivers and their teams, bringing spectators and social media audiences closer to them. After six successful years of the Winter Series, GEDLICH Racing has a deep understanding of what ambitious amateur drivers are looking for.*

*Uncompromising Calendar.*

*Strong car lineup.*

*Extensive Test and Track Time.*

*The 2026 calendar has been designed with the teams and drivers in mind. Five events in six months represent an affordable setting that takes the drivers to the best German and neighbouring locations.*

*The series focuses entirely on ambitious amateur drivers who value equal opportunities and authenticity and appreciate a professional environment.*

*The GT Summer Series is a series for successful people who compete fairly with like-minded competitors to be the best. Amateur drivers and gentlemen finally get the professional platform they deserve.*

## THE NEW HEROES ARENA – THE CENTRAL HUB OF THE GT SUMMER SERIES

*With the HEROES ARENA, the GT Summer Series places its true protagonists firmly in the spotlight: drivers, teams, and partners. Both visually and conceptually, the entire race weekend is designed around the key players of the series.*

Created by GEDLICH Racing, the HEROES ARENA is a spacious, exclusive area located in front of the race office and serves as the communicative heart of the event. This is where sport, presentation, and interaction come together – from the pre-race vehicle grid and driver and team presentations to live-stream interviews and product showcases by partners and sponsors.

The HEROES ARENA presents all the heroes of the racing series in a professional setting and offers a dynamic platform with continuous activity throughout the day. Drivers and teams are also given the opportunity to use the space for their own activations, presentations, and networking initiatives.

While track time is naturally limited, the HEROES ARENA remains available throughout the entire race weekend – as a central stage that is visible, accessible, and full of energy.

*A powerful forum for strong personalities in motorsport.*

## EQUAL OPPORTUNITIES THROUGH DRIVER-SPECIFIC BOP

**A key element is the advanced Balance of Performance, which for the first time also takes the driver's status into account. This creates a fairer and more competitive racing environment where success is not determined by technology alone. In the GT Summer Series, amateur drivers compete with genuine winning potential.**

Technical exemptions and adapted regulations give amateur drivers significantly improved chances of securing a top position in the GTSS and thus experiencing motorsport at the highest level.

This does not mean that professionals are not allowed to compete in the GTSS, but they must expect technical restrictions to ensure a level playing field.

Respect, fairness, and authenticity define the character of the series. It offers an environment in which drivers compete with integrity and share a genuine passion for motorsport.

The clear focus lies on amateur drivers – individuals who are professionally successful, firmly grounded, and united by a true enthusiasm for racing.

## INNOVATIVE LIVESTREAM AND NEW FAN CAM CONNECT THE SERIES AND ITS AUDIENCE

*The GT Summer Series is broadcast live with a production concept that goes far beyond conventional race coverage. The professional GEDLICH Racing livestream sets new standards in motorsport broadcasting and is clearly geared toward an international audience.*

*English-speaking commentators guide viewers through the on-track action and the paddock, ensuring strong global brand communication. An expanded production team and an advanced camera setup deliver outstanding broadcast quality.*

*A special highlight is the new Fan Cam. A dedicated, agile camera crew moves through the paddock throughout the day, providing unfiltered behind-the-scenes access. Fans are brought right into the pit boxes and close to drivers, mechanics, and team principals – authentic, spontaneous, and from the viewer's perspective.*

*Fan Cam content is primarily distributed via social media, creating a direct and easily accessible channel. This approach appeals particularly to a young, digital audience and allows continuous engagement with the series.*

*The combination of a high-end livestream and the dynamic Fan Cam creates a completely new viewing experience: closer, more emotional, and more immersive than ever before. Motorsport is no longer just watched – it is experienced.*

### ELIGIBLE GT-CARS

- » GT4, GT3, GT2
- » Single-make cars like:
  - Lamborghini Super Trofeo
  - Ferrari Challenge
  - Porsche Cup
  - McLaren Trophy
- » GTX class for out-of-homologation cars that fit the series performance window
